EXPERIENCE

- Full stack Developer Intern** | Hakeela.org (Remote) Nov 2025 – Mar 2026
- Built a JWT + refresh-token authorization system with scoped RBAC middleware to secure protected routes across the platform.
 - Implemented sign-up, OTP verification, login, and password-reset flows, streamlining the user onboarding sequence.
- Backend Developer Intern** | AWIBI MedTech Mar 2025 – Jan 2026
- Built and maintained REST APIs for a live user base, optimizing queries to keep response times consistently fast.
 - Designed MongoDB/MySQL schemas for patient records and clinical data, reducing duplication across collections.
 - Built an AI healthcare assistant (Python, LangChain, RAG) to deliver guided symptom triage responses.

PROJECTS

- HostMe — Multi-Vertical Booking Marketplace** *Next.js, React, Tailwind CSS, Node.js, MongoDB, Clerk, Cloudinary, Paystack*
- Building an end-to-end marketplace connecting users to venues, housing viewings, and food pre-orders across Nigeria — API, database, and UI with dual booking engines for exclusive-space and capacity-based reservations.
 - Implemented responsive booking and listing screens in Next.js/React with Tailwind CSS, wired directly to the underlying REST API and MongoDB data layer.
 - Modeled MongoDB collections for listings, bookings, payments, reviews, and vendor roles, with a repository pattern separating data access from route logic.
 - Designed a split-settlement payment workflow (Paystack/Monnify) and a booking-hold system to prevent double-booking conflicts.
- Training Center Management API** *Node.js, Express, Prisma, MongoDB, JWT*
- Built a REST API with JWT auth and capacity-validated enrollment, plus real-time payment tracking to replace manual reporting.
- AuraShop & TrackApp — E-commerce and Expense-Tracking APIs** *Node.js, Express, MongoDB*
- Built modular MVC REST APIs for product catalog/checkout and job-application/expense tracking with validated CRUD operations.
