

ABOLAJI ABDUSAWMOD AKANDE

Backend Engineer · Certified Data Analyst

Ilorin, Nigeria | 08164594914 | sawmodabolaji@gmail.com | github.com/Sawmod001 | linkedin.com/in/abdusawmod-abolaji-b25604245

Backend Developer with 2+ years designing and shipping production-grade REST APIs, auth systems and Database Management using Node.js, JavaScript and Python. Experienced in HealthTech and EdTech environments with a proven record of measurable impact from securing zero-incident authentication layers to deploying containerized services at 99%+ uptime. Student at BoyCode Africa Bootcamp Cohort 5.0 and Alveum x MALhub Tech Talent Acceleration Scholarship. Passionate about building systems that scale and solve real problems.

TECHNICAL SKILLS

Languages & Frameworks: Node.js, Express.js, JavaScript, TypeScript, Python, REST APIs, MVC

Auth & Security: JWT, Refresh Tokens, RBAC, Rate Limiting, bcrypt, OWASP best practices

Databases: PostgreSQL, MongoDB, MySQL, Prisma ORM, Mongoose, Schema Design

AI & ML: LangChain, RAG, AI Chatbots, Prompt Engineering

Data & BI: Python Pipelines, SQL Analytics, Power BI, Excel

Cloud & DevOps: AWS, Docker, Git, GitHub, CI/CD basics, Vercel

Tools: Postman, VS Code, Resend, Cloudinary

PROFESSIONAL EXPERIENCE

Backend Engineer Intern · **Hakeela.org** · Remote Nov 2025 – Mar 2026

- Architected a JWT + refresh-token authorization system with scoped RBAC middleware, reducing unauthorized-access incidents to zero and establishing a security baseline adopted across all platform routes.
- Engineered full user-lifecycle flows — sign-up, OTP email verification, login, and password reset — cutting onboarding friction by ~35% and measurably improving successful registration rates.
- Hardened the API surface by implementing rate limiting, input sanitization, and structured error handling, eliminating the top 3 OWASP attack vectors and aligning the codebase with production security standards.

Backend Developer Intern · **AWIBI MedTech** · Nigeria Jan 2025 – Jan 2026

- Developed and maintained RESTful APIs serving 200+ active users at sub-200ms response times — achieved through query optimization, caching strategies, and lean middleware architecture on a live EHR platform.
- Designed a dual MongoDB/MySQL schema architecture for patient records, appointments, and clinical data, reducing redundancy by ~30% and enabling reliable cross-service query performance.
- Deployed containerized backend services on AWS using Docker, delivering 99%+ uptime and enabling horizontal scaling as the platform's active user base expanded.

PROJECTS

OneEvent — Venue & Event Booking Marketplace — Next.js 15, Node.js, MongoDB, Monnify, Cloudinary, Vercel

- Architected a full-stack booking platform where guests discover verified venues and complete payments held in Monnify escrow — released to hosts only after event confirmation, protecting both parties end-to-end.
- Engineered an 8-status booking state machine with a 10-minute soft-hold conflict prevention system, same-day multi-event support via time-of-day blocking, and a 72-hour dispute window with auto-escalation.
- Built a Telegram Bot alert system for host notifications, automated 24h/2h reminder crons, and a vendor marketplace extension (Phase 2) — all without touching existing models or routes.

Training Center Management API — Node.js, Express, Prisma, MongoDB, JWT

- Built a secure REST API with JWT auth, RBAC, and a capacity-validated enrollment engine — improving billing accuracy by ~40% and blocking 60%+ of invalid requests through layered security middleware.
- Delivered a real-time payment tracking and revenue analytics module, replacing manual reporting with automated financial summaries that cut administrative overhead significantly.

AI-Powered Sickle Cell Healthcare Assistant — Python, LangChain, RAG

- Developed a domain-specific chatbot grounded in verified medical data using RAG and LangChain, minimizing hallucinations and delivering reliable, multi-turn symptom support for underserved patients.

Scalable Auth & User Management API — *Node.js, PostgreSQL, JWT, bcrypt*

- Engineered a PostgreSQL-backed auth system with indexed lookups and connection pooling, cutting average query latency by 40% under load — passing all simulated penetration-test scenarios.

EDUCATION

B.Sc.Ed Science Education · University of Ilorin, Nigeria · 2023 – 2027 (CGPA: 4.10 / 5.00)

CERTIFICATIONS & RECOGNITION

- Student — BoyCode Africa Bootcamp Cohort 5.0 · Alveum × MALhub Tech Talent Acceleration Scholarship 2026
- M4ACE Mentee — Backend Development Cohort 2026 · TrybeFuse Mentorship Cohort 3.0
- Certified Data Analyst, Python Level 3 — CPN/NSQ · Meta AI Developer Academy (RAIN)
- AWS Cloud Training — Arthurite Integrated · Backend Development Certification — Techvoto
- Data Management for Clinical Research — Coursera · JCI Harmony Academy '26

LEADERSHIP & COMMUNITY

- Campus Career Champion (North-Central) — Project1000CareerSessions (2026)
- General Secretary, INSU UNILORIN (2025) — managed 80+ documents, coordinated 300+ participants, scaled membership to 600+.
- Welfare & Volunteer Coordinator, AWC UNILORIN (2025–Present) — managed 200+ members, coordinated 50+ volunteers, improved engagement 40%.
- Honourable of the Year — SESA (2025) · Certificate of Excellence — Ilorin Career Fair (2025) · Ethics Challenge Finalist (82%)
- FSD Core Team (2024–2025) — delivered tech literacy to 300+ students · Tech In Elementary 2026 · Kwara COP Youth Climate Simulation (African Bloc Rep)
